

\$NOKINGS Tokenomics

The purpose of this token is to support the #NOKINGS movement, which began with huge protests against never-ending wars and the increasingly authoritarian regimes funded by certain factions with the aim of more and more power and riches to a few, at the cost of maybe millions of lives in wars and poverty, and the inevitable economic crisis caused by this uncertainty, which is affecting us all.

It is time to take a stand.

It is time to support the hundreds of thousands who turned out to protest in the cities of the US, to keep the hype behind this movement going.

The \$NOKINGS (N-ZERO-KINGS) token is a political statement. Not everyone will like it or support it. But we don't care. Enough is enough.

We want to keep this movement on the agenda.

And of course, we want to make money, for ourselves and our community. We all need it in the face of the economic mess created by our so-called leaders.

This is not just another pump and dump token or scam.

It is being launched on Jupiter studio, with swap fees.

And we will be sharing those fees with the community.

0.25% of all volume will be used to buyback and burn \$NOKINGS, starting at \$500,000 market cap, then at \$1,000,000 market cap, then at every million reached. The burns figure is calculated based on volume. That is, if volume is \$3,000,000 when the market cap has reached \$1,000,000, the amount of buybacks and burns will be 0.25% of the \$3,000,000.

0.25% of all volume will also be awarded to interacting community members in the form of vested airdrops, in the same way. Again, the calculation is based on volume. This is as a thank you for supporting our community and the #NOKINGS movement, and to help people in this time of financial difficulty.

This way, we plan to keep the hype behind this movement on the agenda for as long as possible.

To support the community, qualify for these giveaways and have a chance to make some real gains from the hype, just follow @cryptotaurus0 on X, turn notifications on, and promote the token by liking and retweeting the related posts.

NOTE: We have decided to launch urgently while the iron is hot as if to speak, and a telegram channel will follow after the launch.

Thank you.
