

HOW TO QUALIFY FOR AIRDROPS ON THE GENIE ECOSYSTEM

The Genie Ecosystem will be giving away a generous amount of airdrop tokens to those who buy and hold its tokens. This is an additional measure (together with the sales transaction tax) taken to discourage buyers from dumping the tokens, and ensure the long-term success and sustainability of the tokens. All airdrops are vested and require the staking of previously launched tokens, in line with the conditions set out below:

\$NOSHIT holders will qualify for \$GIVEAWAY airdrop at a rate of 105% of the number of \$NOSHIT tokens held, based on the number of \$NOSHIT tokens held at the time of the \$GIVEAWAY launch. These will be vested for 25 weeks and released at a rate of 4% of the total allocation every week.

The equivalent 4% of \$NOSHIT must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 25 weeks.

\$NOSHIT holders will qualify for \$PREDICTOR airdrop at a rate of 77.7% ($75\% \times 1.036$) of the number of \$NOSHIT tokens held, based on the number of \$NOSHIT tokens held at the time of the \$PREDICTOR launch. These will be vested for 40 weeks and released at a rate of 2.5% of the total allocation every week.

The equivalent 2.5% of \$NOSHIT must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 40 weeks. \$NOSHIT which has already been staked to acquire \$GIVEAWAY airdrops can be used by simply increasing the staking period for a further 40 weeks, subject to the 2.5% weekly limit.

\$NOSHIT holders will qualify for \$GENIE airdrop at a rate of 50% of the number of \$NOSHIT tokens held, based on the number of \$NOSHIT tokens held at the time of the \$GENIE launch. These will be vested for 100 weeks and released at a rate of 1% of the total allocation every week.

The equivalent 1% of \$NOSHIT must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 100 weeks. \$NOSHIT which has already been staked to acquire \$GIVEAWAY and/or \$PREDICTOR airdrops can be used by simply increasing the staking period for a further 100 weeks, subject to the 1% weekly limit.

\$GIVEAWAY holders will qualify for \$PREDICTOR airdrop at a rate of 25.9% ($25\% \times 1.036$) of the number of \$GIVEAWAY tokens held, based on the number of \$GIVEAWAY tokens held at the time of the \$PREDICTOR launch. These will be vested for 40 weeks and released at a rate of 2.5% of the total allocation every week.

The equivalent 2.5% of \$GIVEAWAY must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 40 weeks.

\$GIVEAWAY holders will qualify for \$GENIE airdrop at a rate of 25% of the number of \$GIVEAWAY tokens held, based on the number of \$GIVEAWAY tokens held at the time of the \$GENIE launch. These will be vested for 100 weeks and released at a rate of 1% of the total allocation every week.

The equivalent 1% of \$GIVEAWAY must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 100 weeks. \$GIVEAWAY which has already been staked to acquire \$PREDICTOR airdrops can be used by simply increasing the staking period for a further 100 weeks, subject to the 1% weekly limit.

\$PREDICTOR holders will qualify for \$GENIE airdrop at a rate of 25% of the number of \$PREDICTOR tokens held, based on the number of \$PREDICTOR tokens held at the time of the \$GENIE launch. These will be vested for 100 weeks and released at a rate of 1% of the total allocation every week.

The equivalent 1% of \$PREDICTOR must be staked for each weekly airdrop by sending it to the Treasury wallet to be specified. Staking period is 100 weeks.

VERIFICATION REQUIREMENT

\$NOSHIT Purchase Verification Instructions (Required to be able to benefit from airdrop)

To qualify for your airdrops you must verify your purchase in the official Telegram.

Step 1: Find your Transaction Signature

The signature is a long string of letters and numbers (about 88 characters). Here is how to find it:

If you used Phantom/Solflare: 1. Open your wallet and click the "Activity" tab (the clock or list icon).

2. Click on your recent "Swap" or "Buy" transaction for \$NOSHIT.

3. Scroll down and click "View on Solscan" or "View on Explorer."

4. At the top of the page, copy the "Signature" or "Transaction Hash."

If you are on Pump.fun:

Go to the \$NOSHIT token page.

Look at the "Trade History" at the bottom.

Find your buy (it will match your wallet address).

Click the small blue arrow or "transaction" icon next to your trade to open it on Solscan, then copy the Signature.

Step 2: Submit to the Verification Channel

Go to the #Verify-Buy channel in our Telegram and post your details in the following format:

Verification Request

Wallet Address: [Your Solana Wallet Address]

Transaction Signature: [Paste the long signature here]

Sponsor Code: #CODE (e.g., #ALI01—get this from your Growth Officer)

Step 3: Look for the "Verified Founder" Tag

Once our Senate Moderators verify the transaction on-chain:

You will receive a "Verified Founder" role/tag in Telegram.

Your wallet will be added to the Airdrop Whitelist.

Your Sponsor will receive their 10 Points and 0.2% SOL referral fee.

Important Rules

Minimum Buy: Only purchases of 0.01 SOL or more qualify for verification and points.

No Deletions: If you sell 100% of your \$NOSHIT before the \$GIVEAWAY launch, your verification will be voided, and you will forfeit the airdrop.

One Wallet, One Account: To prevent Sybil attacks, each Telegram account can only verify one Solana wallet.
